WEB DEVELOPMENT PROFILE

Self-motivated and solutions-oriented web developer with intensive academic training and project management skills. Proven ability to manage project life cycle, and apply new technology in an agile team environment to implement within real world applications.

EDUCATION & SKILL DEVELOPMENT

Coding Dojo – Web Development Bootcamp, Burbank, CA | 2015

- Spent over 1,100 hours of intensive study across three MVC frameworks and multiple web technologies to develop numerous apps towards completion of learning three full-stacks.
- Focused on learning new and relevant frameworks, completing collaborative coding challenges, and developing applications

Self-Directed Education | 2015

Codecademy, Lynda, Udemy, W3Schools

University of California, Irvine | 2011 – 2013

Bachelor of Arts, Sociology
Minor, Business Management

PROJECTS

1. Secrets Anonymous – An app where users can post anonymous secrets to a public page, “like” and comment on those secrets.

Technology: Ruby on Rails, HTML5, CSS, Twitter Bootstrap, PostgreSQL, Deployed on Heroku

2. Events Express – Users can join or cancel existing events, or create events where others can join. Each event page contains a comment box for any updates from the host or any questions.

Technology: Ruby on Rails, HTML5, CSS, Twitter Bootstrap, PostgreSQL

WORK EXPERIENCE

Advantmed (d.b.a RecordFlow), Santa Ana, CA | 2013 – 2015

Sr. Account Manager

- Managed over 20 client accounts per year by developing project plans and executing established processes to ensure successful project completion in co-ordinance with Sales, Operations, and Call Center teams
- Responsible for the day-to-day management and coordination of multiple concurrent large-scale HEDIS, as well as risk adjustment/HCC projects for various health insurance companies across the country
- Reviewed contracts to ensure correct execution of deliverables for clients and accountable for meeting Service-Level-Agreements (SLAs) and all project milestones
- Led client calls to ensure that all projects are on-track and resolve any escalated cases that arise
- Provided primary software support for clients and train end-users on RecordFlow's proprietary software
- Created and facilitated project tasks by utilizing JIRA to ensure deliverables are properly managed and completed
